

* Important Theorems:

- 1- If $f' > 0$ on interval I , then f is increasing on I .
- 2- If $f' < 0$ on interval I , then f is decreasing on I .
- 3- If $f'' > 0$ on interval I , then f is concave up on I .
- 4- If $f'' < 0$ on interval I , then f is concave down on I .

Ex 8] Sketch (Graph) for $y = x^3 - 3x^2$.

Solution:

① y-intercept ($x=0$) \Rightarrow $y=0$

x-intercept ($y=0$)

$\Rightarrow 0 = x^3 - 3x^2$

$0 = x^2(x-3) \Rightarrow x=0$ or $x=3$

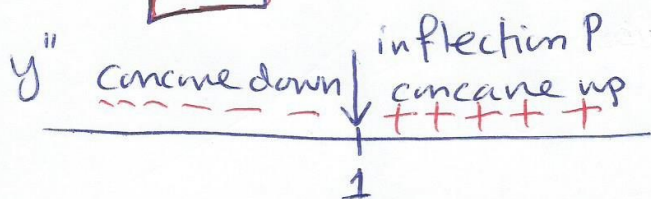

② $y' = 3x^2 - 6x$
 $= 3x(x-2)$

$x=0$ or $x=2$

③ $y'' = 6x - 6 = 6(x-1)$

$x=1$

④
