The grading of in-class assignments and quizzes was fair.

Statistics	Value
Response Count	32
Mean	4.7
Median	5.0

I felt prepared for each lab session.

Statistics	Value
Response Count	32
Mean	4.3
Median	4.0

What is your impression of the difficulty of the quizzes conducted during tutorial sessions? Were the problems consistent with the material presented in class?

Comment
The quiz difficulty was average, some were harder than others but the TA provided adequate lessons based on the material.
I feel that the quizzes were sometimes difficult but always related to the material we were covering at the time.
Moderately challenging yet fair.
They were a lot harder than questions we would receive on tests or homework but the TA would explain to help us as much as he could.
Problems on quizzes were usually the only thing that would give an idea of the test problems
Most of the time they were consistent, other times I felt they were not.
They were on some of the easiest examples of the subject that could be found. It'd be more worthwhile to be given some more difficult problems and, in turn, be more prepared for exams and retain the material better.
yes.
Kind of hard to understand
The difficulty of the quizzes was fair, however, the lecture content was usually ahead of the lab content.
Yes, the problems were consistent with the material presented in class.
no it is good
I thought that they were adequate.
The quizzes were just about the right amount of difficulty based on the lecture the TA presented.
I was prepared for the quizzes and all the material on the quizzes was covered in class or in lab before the quizzes were given.
I felt that he prepared me well for each quiz and they were consistent with the course work and current topics
not to bad
I thought the difficulty was just right in lab as i was challenged to learn yet wasn't completely lost.

Comment
Good instructor can go too fast occasionally but overall knows his material very well.
He was always prepared, and provided not only excellent examples from the course material but also provided alternate solutions and methods he had created.
Great TA
Very helpful and understanding.
Mohammed exceeded my expectations as a TA, he was extremely helpful, and the material and lectures he provided aided greatly in my understanding of the course material.
Cares a lot about his students and is always available to help. Best TA I've ever had!
Mohammed was a very nice TA who knew an impressive amount about the subject he was teaching. He came to each lab session prepared to teach and graded us extremely fairly for the effort that we put in. He also offered ample opportunity to make up any points that may be missing through extra credit and make-up quizzes and would often stay behind after lab to cover any extra questions that you might have. Awesome job Mohammed!
Cool guy
Seems pretty enthusiastic about teaching.
Mohammed was very helpful as a TA, and was always willing to answer questions or further explain concepts. He was always flexible if you needed to meet with him and never showed up unprepared. It also helped that he was very passionate about his subject.
He was a great TA in all aspects!

He is very helpful and nice

I really enjoyed him and he was very helpful.

Thanks for teaching!

He was very helpful and was concerned with doing his best to make sure everyone succeeded.

He's the bomb.com

Great TA!!

n/a

Mohammed is one of the only reasons i have a chance at passing this class lecture has done no good whatsoever and Mohammed has taught the material better than the professor for the class.
